Flower Seed Novelties

The following are selections of the BEST NOVELTIES and represent the CREAM OF THE LATEST PRODUCTIONS of AMERICAN and EUROPEAN growers

THE BEST NOVELTY SPENCER SWEET PEAS FOR 1916

FARNHAM LAVENDER

Pure lavender self, very free, giving mostly four flowers well placed on fine, long stems. **Trade pkt. 25 cts., 5 trade pkts. \$1.00.**

FIERY CROSS

Fiery Cross has all the appearance of live fire, the color being a scorching fire red, or scarlet, without any shading and which scintillates and glitters in bright sunlight, thus adding a glowing fire-like sheen which radiates over the flower. Unlike most of the orange-scarlet varieties, it does not scorch or burn even during extended periods of intense sunshine, therefore it can be grown in all soils without shading. The beautifully waved and fluted flowers are borne freely in threes and fours, well placed on long, stout stems.

Trade pkt. 25 cts., 5 trade pkts. \$1.00.

HILARY CHRISTY

Standard. frosted orange-cerise, with crenulated fiery-scarlet edge, wings rosy carmine, keel delicate fawny lemon; its rich though subdued colorings are very chaste and refined. The plant is strong-growing and very free flowering, producing its large, beautifully shaped flower on long, strong stems.

Trade pkt. 20 cts., 6 trade pkts. \$1.00.

JEAN IRELAND

A large flower of great refinement. The color is creamy buff, the fine broad standard and wings being beautifully edged and shaded with carmine rose.

Trade pkt. 25 cts., 5 trade pkts. \$1.00.

MAY DAY

Lovely, deep sky-blue self, large flowers, carrying four blooms on stem. Fine for exhibition.

Trade pkt. 20 cts., 6 trade pkts. \$1.00.

THE LADY EVELINE

A grand, new, rosy mauve Sweet Pea, for all purposes ideal. It is bound to be the mauve of the show bench. Its great size and lovely color are enhanced by the perfect placing of the flowers, which are duplex in character. No variety equals it for a massive vase. It resists bad weather, and four-bloomed sprays are common. For garden decoration the rows or clumps are covered with huge blooms, and growers are recommended not to plant out too thickly. The Lady Eveline Miller, on visiting the raiser's garden, singled it out as her prime favorite, and specially asked the above name to be given to it.

Trade pkt. 25 cts., 5 trade pkts. \$1.00.

THE PRESIDENT

The name given this magnificent novelty is most appropriate, as among orange-scarlet Sweet Peas it undoubtedly takes top place. The intensely rich and dazzling orange-scarlet color of the flower equals in brilliance the Oriental Poppy. The plant is very robust, producing freely flower stems 16 to 18 inches long, carrying four perfectly placed flowers of largest size and true Spencer form. Both for exhibition and garden decoration The President is the most striking and valuable addition to Sweet Peas that has been offered in recent years.

Trade pkt. 20 cts., 6 trade pkts. \$1.00.

WHITE PERFECTION

An extra large white, of good substance, strong grower, flowers exceptionally waved. Throws fours freely, and in some cases five and six flowers to a stem; a really good white variety.

Trade pkt. 20 cts., 6 trade pkts. \$1.00.

COLLECTION—ONE PACKET EACH VARIETY FOR \$1.75

Fiery Cross

ASTER**Giant Hohenzollern,
Coppery Scarlet**

A bright and attractive color in this most valuable strain of Asters. The enormous flowers measure about 6 to 7 inches in diameter, are borne on strong and long stems and the very long petals are curled and twisted. Most suitable for exhibition, but also valuable for cutting, where largest blooms of Asters are required. **Trade pkt. 25 cts., 5 trade pkts. \$1.00.**

ASTER**Victoria Toison d'Or
(Golden Fleece)**

This variety was "Highly Commended" by the Royal Horticultural Society in their trials at Wisley last season. The flowers are bright yellow, superior in depth of color to any other yellow Aster. **Trade pkt. 20 cts., 6 trade pkts. \$1.00.**

CARNATION**Giant Margarita,
Golden Yellow**

A valuable addition to this popular class of Carnations, obtained by continued selection. The flowers are well formed, pure yellow, and borne on long, stout stems; invaluable for cutting. **Trade pkt. 20 cts., 6 trade pkts. \$1.00.**

COLEUS**Hybridus Rococo**

A new type of Coleus, with unique leaves, green and gold, in very fancy markings. Makes an elegant pot plant and does well for bedding. **Trade pkt. 30 cts., 4 trade pkts. \$1.00.**

COSMOS. Slocombe's Midsummer Giants

This variety commences to bloom in August and continues until cut down by the frost. Produces giant flowers, mostly pink and white, and cannot be recommended too highly for florists. **Trade pkt. 15 cts., oz. \$1.50.**

CYCLAMEN, Eileen Low

The color is a lovely shade of pink, with a distinct bluish-white margin and bluish-white crest on each petal. Unique. Robust and very free flowering. **Trade pkt. 75 cts., 3 trade pkts. \$2.00.**

DAHLIA, New Collarette

These Dahlias promise to eclipse all others. Wherever shown, they have caused intense interest. As cut-flowers they are much superior to ordinary singles, lasting double the time in water. The ground colors range through all shades of crimson, scarlet, rose, pink and white, while the "collars" are usually yellow, primrose or white. Sow in January or February in heat, and treat afterward as Dahlias propagated from cuttings. The plants will bloom from July till cut down by frost. **Trade pkt. 20 cts., 6 trade pkts. \$1.00.**

LOBELIA Hybrid, Sapphire

This new, trailing variety is of remarkably strong growth; the flowers are unusually large for a Lobelia, measuring $\frac{3}{4}$ inches across, and are thickly set on the long, graceful sprays of foliage; color of flowers intense, deep blue, with large and clearly defined white eye. A well grown plant covered with these lovely blue oculate flowers makes a splendid sight. **Trade pkt. 20 cts., 3 trade pkts. 50 cts.**

Primula malacoides superba

NIGELLA**Miss Jekyll, Pure White**

Quite a new departure. The well-known Miss Jekyll Nigella in pure white, which stands out bold against the green foliage and a pretty contrast to the sky blue of the original variety. A valuable addition to the annual border; most decorative for parlor and florist alike. **Trade pkt. 20 cts., 6 trade pkts. \$1.00.**

PRIMULA**Malacoides Superba**

A new and improved variety; flowers larger and much deeper in color than the old Malacoides. The color is deep, rosy pink, a great improvement. The habit of the plant is also better than the old variety. A first-class plant for greenhouse decoration during Winter. (See illustration.) **Trade pkt. 50 cts., 3 trade pkts. \$1.25.**

PRIMULA**Malacoides Rosea**

The flowers vary in color from light rose to brightest carmine-rose. During February and March the plants are almost covered with blooms. **Trade pkt. 50 cts., 3 trade pkts. \$1.25.**

PRIMULA**Obconica Grandiflora
Striata**

Florists require something extraordinary at times and to those this should strongly appeal, as a striped Primula is very unusual. This new variety produces handsome flowers in abundance and has all the merits of its type, both as a pot plant and cut flower. Carmine-rose and lilac. **Trade pkt. 50 cts., 3 trade pkts. \$1.25.**

SCHIZANTHUS, Compact Picotee-edged

A dainty variety, very full, white, frilled flowers, showing a distinct band of pink on the edge. Comes true from seed and makes a charming pot plant. **Trade pkt. 75 cts., 3 trade pkts. \$2.00.**

SCHIZANTHUS**Large-flowered Hybrids, White and
Pink Shades**

Many of our customers prefer to have white and pink shades only, and we have arranged in this mixture to exclude the other colors. **Trade pkt. 50 cts., 3 trade pkts. \$1.25.**

STATICE Suworowi Alba

Those interested in annuals will find this charming new and distinct variety a splendid acquisition. The habit of growth is dwarf and compact, with long, candelabra-shaped sprays of pure white flowers produced in great profusion. These in a cut state are very useful for floral designs or decorating purposes, while the plants are equally effective for bedding purposes or pot culture. **Trade pkt. 20 cts., 6 trade pkts. \$1.00.**

SWEET WILLIAM, Giant White

We have raised several new types in the past, and this is the first "self" from our Giant strain. Really beautiful, and comes true from seed. **Trade pkt. 20 cts., 6 trade pkts. \$1.00.**

CULTURAL DIRECTIONS

Take a clean 5 or 6-inch pot, or 6 to 7-inch pan, and fill it to within 2 inches of the top with coarse ashes; on top of this put about 1½ inches of fine soil and firm down; give good watering with boiling water, using a fine rose; after drying off a little, sow the spores but do not cover, put in a saucer filled with water, placing a pane of glass over the pot or pan. Never top-water. After first real leaves appear they should be pricked out into flats.

PANSIES Boddington's Giants

Our Giant Pansy Seed during the past season gave unprecedented satisfaction. All the testimonials received mentioned specially the high grade of flowers—color, form and size of the blossoms. This year, by adding improved types, intending customers can absolutely rely on a duplication of last season's success.

Sow seed in April, in light and well-moistened soil, improved by Clay's Fertilizer, cow-manure, or bone meal, in flats. When the seedlings are large enough to handle, transplant to permanent position, which must be light, well sheltered, and away from trees or branches. If exhibition blooms are wanted, allow only one bloom to grow on each shoot; water freely. Can also be sown in July and August for the following Spring; protection from frost is necessary.

Recent News Item:—"A proposal is on foot to make Pansy the national flower of the United States."

PRIMULA SINENSIS

The flowers are remarkable, not only for size, beauty and brilliancy of the colors, but for the great substance of the petals. Considerable care is necessary in order to secure the successful germination of the seed of the choice kinds of P. Sinensis. The most suitable periods for sowing are January to May for Autumn, and June to August for Spring blooming. Shallow pans, well drained, are the best, the soil consisting of sandy loam and leaf-mold, worked through a fine sieve; the pans when thus prepared should be well watered before the seed is sown. Only a slight covering of soil or sand is needed. What has most to be guarded against is drought; the soil should be kept in an equable degree of moisture as possible, never being on the dry side. We attribute more failures to this cause than to any other. Just at the time when the seed commences to germinate the least departure from this is fatal.

(The Magic Lily of Japan)

A perfectly hardy Amaryllis, producing beautiful pink flowers.

Lycoris squamigera produces in early Spring foliage which grows until July, when it ripens off and disappears, and one not familiar with its habits would think the bulb had died, but about a month later, as if by magic, the flower-stalks spring from the ground to a height of 2 or 3 feet, developing an umbel of large and beautiful lily-shaped flowers 3 to 4 inches across and from eight to twelve in number, of a delicate lilac pink.

Very useful for cut flowers in the Summer.

BODDINGTON'S QUALITY ROSES

HARDY HYBRID PERPETUAL ROSES

LARGE TWO-YEAR-OLD BUSHES

Culture.—Roses require ordinarily good garden soil well enriched with well-rotted manure. They must have an open sunny position, clear of the roots of all trees and shrubs. Prepare the beds a few days before planting to allow for settling. Everblooming Roses should be planted 18 inches apart and the Hybrid Perpetuals 2 feet apart.

Roses should be planted with the roots diverging and at least 9 inches below the surface of the ground, the soil made firm about them and liberally watered.

For best results Everblooming Roses should be severely pruned; the stronger shoots should be cut back to about 12 inches in height, and the Hybrid Perpetuals to about 18 inches, while all weak, thin wood should be removed entirely.

Dorothy Perkins Rambler Roses

HARDY CLIMBING and RAMBLER ROSES

ALL OUR CLIMBING AND RAMBLER ROSES ARE STRONG TWO-YEAR-OLD FIELD-GROWN PLANTS

Climbing Roses require no pruning in the Spring beyond the cutting out of very old or dead wood; a severe pruning in July is beneficial directly after they have finished flowering. Cutting away at that time all old flowering wood will encourage a vigorous growth, which will give an abundance of flowers the following season.

AMERICAN PILLAR. A new single-flowering variety of great beauty. The flowers are 3 to 4 inches across, of a lovely shade of pink. These flowers are borne in immense clusters. They last in perfection a long time, and are followed by brilliant red hips or berries, which are carried late into the Winter; and as the plant frequently retains its lovely green foliage until the end of November, it forms a beautiful decorative subject throughout the Autumn months. Strong, two-year-old plants, 30 cts.; bundle of five, \$1.75; \$30.00 per 100.

AVIATEUR BLERIOT. We have discarded the old yellow Rambler in favor of this new variety, in which we have a strong-growing plant with beautiful glossy, insect and disease-proof foliage, and bearing large clusters of medium-sized full double flowers of a saffron yellow, deepening to an almost golden yellow at center. Strong, two-year-old plants, 40 cts. each; \$1.75 for five; \$30.00 per 100.

CLIMBING AMERICAN BEAUTY. This new climbing form of the famous crimson Rose so long the American favorite for cutting is as lovely and fragrant and deeply colored as the bush form. The hardy climber blood with which it is crossed gives healthy, perfect foliage and a strong climbing habit of growth; the abundant bloom being in prime before the June show of the bush type. 50 cts. each; \$2.00 for five; \$35.00 per 100.

CRIMSON RAMBLER. (American-grown.) Strong, 2-year-old plants, grown on their own roots, at the following prices: 4 to 5 feet long, 40 cts. each, \$4.00 for 10, \$35.00 per 100; 4 feet long, 25 cts. each, \$1.25 for 5, \$20.00 per 100.

DOROTHY PERKINS. Color a lovely shell-pink, holding a long time without fading. 20 cts. each, 85 cts. for 5, \$16.00 per 100.

WHITE DOROTHY PERKINS. A white-flowered form of Dorothy Perkins, very free of bloom and especially valuable because of the rarity of good white Climbing Roses. 35 cts. each, \$1.50 for 5, \$25.00 per 100.

HIAWATHA. The flowers are single, and are of a deep, intense crimson shade with the petals shading to a pure white base. Flowers very freely. Extra-strong, 2-year, field-grown flowering plants, 40 cts. each; bundle of five, \$1.75, \$30.00 per 100.

LADY GAY. The flowers are of a delicate cherry-pink, which fades to a soft white. The foliage is very profuse and of a glossy deep green. The effect of a plant in full bloom, with the combination of the soft white flowers, the cherry-pink buds, and the deep green foliage, is indeed charming. Extra-strong, 2-year plants, 30 cts. each; bundle of five, \$1.25; \$20.00 per 100.

PAUL'S CARMINE PILLAR. One of the most attractive Climbing Roses. Flowers large and free; color rosy carmine. Two-year-old, field-grown, 30 cts. each, \$1.25 for five, \$20.00 per 100.

TAUSENSCHON. (Thousand Beauties.) This beautiful climbing Rose is the result of several crosses between the well-known Crimson Rambler with Tea and Polyantha Roses. The flowers appear from beginning of June till end of July, in large, loose clusters; of a lovely soft pink color, later on the somewhat curled petals assume a carmine-rose, when in full bloom, giving the appearance of two different varieties. 30 cts. each; bundle of five, \$1.25; \$20.00 per 100.

Everblooming Bush or Baby Ramblers

BABY DOROTHY. A lovely shell pink. Baby Dorothy, when planted out, flowers perpetually from Spring until Autumn. Strong, field-grown plants, 20 cts. each, bundle of five, 85 cts.; \$16.00 per 100.

CATHERINE ZEIMET. A white Baby Rambler Rose, larger and better flowers than the type. An important fact is that it has the true Rose perfume in a high degree. 20 cts. each; bundle of five, 85 cts.; \$16.00 per 100.

ERNA TESCHENDORFF. Color brilliant dark carmine-red. 30 cts. each; bundle of five, \$1.25; \$20.00 per 100.

MRS. WM. H. CUTBUSH. A grand acquisition to the Baby Rambler class. Color intense crimson, and exceptionally free-flowering. 20 cts. each; bundle of five, 85 cts.; \$16.00 per 100.

MME. NORBERT LEVAVASSEUR (The Original Baby Rambler). A dwarf-growing, everblooming Crimson Rambler. This blooms when a small plant and forms clusters of flowers as large as the Crimson Rambler. Two-year-old field-grown plants. 20 cts. each; bundle of five, 85 cts.; \$16.00 per 100.

Gould's Barrel Cart

The Kirke Automatic Lawn Feeder, Fertilizer and Insecticide Distributor

Abolishes the use of stable manure so objectionable because of its disagreeable odors and the abundance of weed seeds it contains.

It applies the fertilizer while watering, and feeds the grass or garden with high-grade, immediately available, concentrated plant-food. It is a neat device easily attached to any garden hose. It will last a lifetime, and can be used both for Kirke Fertilizer and Insecticide cartridges.

The cartridges of Concentrated Fertilizer for the lawn and garden, and the Nicotine cartridges for the destruction of soft-bodied insects, dissolve in as much water as will pass through the ordinary garden hose in about five hours. They are clean, odorless and non-poisonous, and will give perceptible results after one week's use on the lawn or in the garden.

The cartridges that fit into the feeder are prepared from the highest grade of concentrated fertilizers, absolutely soluble and quick acting.

Kirke Feeder and Distributor

The fertilizer cartridge is sufficiently hardened to prevent a too rapid wasting.

The nicotine cartridge is made from a free nicotine, which when applied to both indoor and outdoor vegetation, acts as a preventive against aphids, thrip, green fly, rose bug, mealy bug, etc.

The Dunham "Water-Weight" Lawn Roller

The Dunham "Water-Weight" Roller with handle weights is the most satisfactory and serviceable Roller. The handle weights (shown in the illustration) are to counterbalance the weight of the handle, and keep it in an upright position off the ground, otherwise the wooden handle-bar would soon rot and metal handle-frame become incrustured with rust. Insist upon a Roller having handle weights, as they also add speed and ease of operation to the Roller. The "Water-Weight" Roller can be filled with water or sand to the required weight. The smallest model weighs 120 pounds empty, 260 pounds filled with water, and 360 pounds filled with sand. The Dunham "Water-Weight" Roller is electric-welded, making the water section one solid drum; no rivets are used; it cannot leak. The rolling surface is perfectly smooth. **All Dunham Rollers are roller-bearing.** The "Water-Weight" feature enables the weight of the Dunham Roller to be adjusted to the conditions of the soil to be rolled and the strength of the operator. Cast-Iron Hand Lawn Rollers

Made in one, two and three sections. The face of each Roller is made smooth, with outer edges rounded to avoid cutting the lawn or garden. Roller-bearing, outside counterbalancing weights to keep the handles in an upright position. The Rollers of two or more sections are preferable, as they will not injure the grass when turning. The best one-man Rollers are those averaging from 250 lbs. to 500 lbs.
